INDEX TO VOLUME XXVIII

The asterisk* preceding the page number indicates an original article in the Journal. The letter [T] preceding the page number indicates a paper reported in the Transactions of the American Association of Neuropathologists. The letter [D] preceding the page number indicates a discussion of an original article or some other item published in the Journal. The letter [B] preceding the page number indicates a book review. Subject entries are made for all articles. Author entries are made for original articles and Society Transactions.

Absence of cerebral myelin sheaths in a case of presumed pelizaeus-merzbacher disease,*243

Acetylcholinesterase activity in rodent's brains after administration of either compazine or mescaline, [T]165

Acrylamide intoxication in the cat, the pathogenesis of dying-back polyneuropathies, *598

Adachi, M., B. W. Volk, and J. Torii, electron microscopic and histochemical studies of myenteric plexus in lipidoses, [T]177

—, see Volk, B. W., [T]171

Adenosine triphosphatase activity in experimentally induced cerebral edema, [T]162

Adriaenssens, K., see Zeman, W., [T]169, [T]170

Alvord, Jr., E. C., see Lisak, R. P., [T]172

Amaducci, L., see Cassani, G. B., *308

Ambler, M., S. Pogacar, and R. L. Sidman, lhermitte-duclos disease (granule cell hypertrophy of the cerebellum) pathological analysis of the first familial cases, *622

Ames, R. P., see Rubin, R., *371

Amyotrophic lateral sclerosis of guam, enzyme activities in individual motor neurons in, *267

Anderson, P. J., see Song, S. K., [T]158

A morphologic and biochemical study of canine globoid leukodystrophy, [T]171

Andrews, J. M., see Suzuki, K., [T]171

Anophthalmia, primary bilateral, *321

Appenzeller, O., and J. MacGee, gas-liquid chromatographic analysis of sural nerves in peripheral neuropathies, [T]181

Armitage, J. L., see Schutta, H. S., *321

Arnason, B. G. W., see Aström, K. E., [T]172

Arterial and venous blood supplies to the cerebellum of primates, *295

Arthrogryposis multiplex congenita. Report of two cases of radicular type with familial incidence, [T]156

Åström, K. E., H. deF. Webster, and B. G. W. Arnason, early lesions in experimental allergic neuritis (EAN). A phase, light and electron microscopic study, [T]172

ATPase activity in viral and chemically induced astrocytomas, [T]155

Axonal dystrophy in a deer mouse (*peromyscus maniculatus*) with an inherited ataxia and tremor, *257

Bagdanowicz, W., see Margolis, G., [T]155

Barden, H., the histochemical relationship of neuromelanin and lipofuscin, *419

—, in vitro melanization of rhesus neuromelanin by pseudoperoxidation of catechol derivatives, [T]166

Baringer, J. R., and J. F. Griffith, experimental herpes simplex encephalitis. A correlated light, phase, and electronmicroscopic study, [T]159

Barker, M., see Wilson, C. B., [T]156

Barrett, R. E., N. H. Neff, E. Costa, and P. Duffy, compartmentation of rat pineal monoamines as revealed by histochemical, electronmicroscopic and pharmacological studies, [T]166

Barron, K. D., see Daniels, A., primary degeneration of the thalami and inappropriate A.D.H. secretion associated with bronchogenic carcinoma, [T]176

Barto, E., see Vandermeer, J., *257

Becker, N. H., see Hirano, A., *507

Behavioral deficit associated with transplacentally induced microcephaly in the rat, [T]177

Benign hypertrophy of cerebellar cortex, [T]153

Bigner, D. D., G. L. Odom, M. S. Mahaley, Jr., and E. D. Day, brain tumors induced in dogs by the Schmidt-Ruppin strain of rous sarcoma virus. neuropathological and immunological observations, *648

Blakemore, W. F., the fate of escaped plasma protein after thermal necrosis of the rat brain: an electron microscope study, *139

Blood supply of primate cerebellum, *295

Book review, [B]352, [B]512

Bornstein, M., J. Leestma, and L. Feldman, herpes-simplex virus-host cell relationships in cultured mammalian nerve tissues, [T]160

Bourne, J. M., see Margolis, G., [T]155

Bowfin, glial footplates in. I. ultrastructure and chemistry, *513

Brain swelling and hemorrhagic cortical

necrosis following perinatal asphyxia in the monkey, T178
Brain tumors induced in dogs by the schmidt-ruppin strain of rous sarcoma virus. neuropathological and immunological observations, *648
Brann, Jr., A. W., and R. E. Myers, brain swelling and hemorrhagic cortical necrosis following perinatal asphyxia in the monkey, T178
Brightman, M. W., and T. S. Reese, the role of intercellular junctions in the movement of substances within the brain, T167
Brzin, M., see Tennyson, V., T165
Budzilovich, G. N., see Peña, C. E., T156
Bunge, R. P., a comparison of neuronal changes following colchicine treatment with observations on other conditions involving the accumulation of neurofilaments, T169
—, see Harter, D. H., *185
Bunge, M. B., see Bunge, R. P., T169

Carpenter, S., see Karpati, G., T157
Case of leukodystrophy with absence of myelin formation, T171
Cassano, G. B., P. L. Viola, B. Ghetti, and L. Amaducci, the distribution of inhaled mercury (Hg^{203}) vapors in the brain of rats and mice, *308
Cellular degeneration in the cerebellum of normal infant rats, T180
Cerebellum of primates, the arterial and venous blood supplies to the, *295
Cerebral medulloepithelioma with maturation into ependymal cells and ganglion cells, *442
— myelin sheaths, absence of, in a case of presumed pelizaeus-merzbacher disease, *243
Changes in skeletal muscle following tenotomy: histochemical and electronmicroscopic study, T158
Chediak-higashi disease, neuropathological changes, in, *86
Chemical induction of microencephaly in rats, T162
— pathology of G_{M1}-gangliosidosis (generalized gangliosidosis), *25
Chen, K., see Hirsch, H. E., *267
Cinemicrography of normal and neoplastic astrocytes, T156
Comparison of neuronal changes following colchicine treatment with observations on other conditions involving the accumulation of neurofilaments, T169
Compartmentation of rat pineal manoamines as revealed by histochemical, electronmicroscopic and pharmacological studies, T166
Convection of thiamine pyrophosphase from the golgi apparatus to the rough endoplasmic reticulum. A new pathological lesion, T180
Cook, S. D., and P. C. Dowling, DNA synthesizing peripheral blood leukocytes in neurologic disease, T181
Costa, E., see Barrett, R. E., T166
Courville, C. B., pathogenesis of alcoholic central pontine myelinosis, T174
Cowen, D., see Sung, J. H., *86
Cultured mammalian nervous tissue, cytopathic effects of visna virus, in, *185
Cytopathic effects of visna virus in cultured mammalian nervous tissue, *185

Day, E. D., see Bigner, D. D., *648
DNA synthesizing peripheral blood leukocytes in neurologic disease, T181
Daniels, A., and K. D. Barron, primary degeneration of the thalami and inappropriate A.D.H. secretion associated with bronchogenic carcinoma, T176
Deck, J. H. N., cerebral medulloepithelioma with maturation into ependymal cells and ganglion cells, *442
Deficiency of ganglioside GM_1 galactosidase activity in generalized gangliosidosis, T170
Dekaban, A. S., selective radiation damage to phylogenetically different cerebral structures of the fetus, T162
del Cerro, M. P., and R. S. Snider, cellular degeneration in the cerebellum of normal infant rats, T180
Dembitzer, H. M., see Hirano, A., *507
Dementia with uncommon histopathologic changes, T175
Demyelinating antibodies of experimental allergic encephalomyelitis and peripheral neuritis, represented by demyelinating pattern in vitro, T180
Distribution of inhaled mercury (Hg^{203}) vapors in the brain of rats and mice, *308
Distribution of peroxidase in the triethyltin intoxicated rat brain, *507
Dowling, P. C., see Cook, S. D., T181
Duffy, P., see Barrett, R. E., T166
Dyken, P., see Watanabe, I., T171, *243
Dystrophy, axonal, in a deer mouse with an inherited anoxia and tremor, *237

Earle, K. M., see Lampert, P. W., *353
Early lesions in experimental allergic neuritis (EAN). A phase, light and electron microscopic study, T172
Edema of cerebral cortex in acute stages of cold injury, T178
Effect of dexamethasone on cerebral edema in cats, T179
— of gamma irradiation on the postnatally developing canine cerebellar cortex. I. effect of single sublethal exposures, *119
— of nerve growth factor (NGF) on the synthesis of gangliosides by developing neural tissue, T172
Effects of gamma irradiation on the postnatally developing canine cerebellar cortex. II. sequential histogenesis or radiation-induced changes, *128
— of hypothermia on the role of lysosomes in experimental brain injury, T161

Electron microscope study, the fate of escaped plasma protein after thermal necrosis of the rat brain, *139
— microscopic and histochemical studies of myenteric plexus in plexus in lipidoses, T177
— microscopic studies on spongy and cavernous degeneration of the optic nerve in experimental acute glaucoma, T180
— microscopic study of target fibers and related abnormalities inhuman muscle, *214
— microscopy of human tumors secreting catecholamines: correlation with biochemical data, *475
— probe analysis of mineral deposits in the central nervous system, T157
Electrophysiological, enzyme histochemical, and morphological characteristics of purkinje cells of the developing rat cerebellum, T163
Ellington, E. E., see Margolis, G., T155
Ellison, G., progressive multifocal leukoencephalopathy (PML): I. investigation of the immunologic status of a patient with lymphosarcoma and PML, *501
Embree, L. J., H. M. Shein, P. Benda, and H. H. Hess, ATPase activity in viral and chemically induced astrocytomas, T155
Encephalopathy, experimental kuru, in chimpanzees and spider monkeys, *353
Engel, W. K., see Fardeau, M., *278
Enzyme activities in individual motor neurons in amyotrophic lateral sclerosis of guam. A quantitative histochemical study, *267
Ependymoblastoma, virus-like particles in urine, *371
Experimental herpes simplex encephalitis. a correlated light, phase, and electron-microscopic study, T159
— kuru encephalopathy in chimpanzees and spider monkeys, *353
— lead neuropathy: a disease of the supporting cells in the peripheral nervous system, *401
— production of acute neuroaxonal dystrophy, T173

Falk, G. S., see Greenberg, R., *475
—, see Lisak, R. P., T172
Fardeau, M., and W. K. Engel, ultrastructural study of a peripheral nerve biopsy in refsum's disease, *278
Faris, A. A., F. Lopez, and C. M. Poser, post infectious mesencephalopathy, T174
Fate of escaped plasma protein after thermal necrosis of the rat brain: an electron microscope study, *139
Feigin, I., presidential address: neuronal tissues of mesenchymal origin, *6, T152
—, see Peña, C. E., T156
Feldman, L., see Bornstein M., T160
Fine structure of nuclear inclusions in the brain of experimental golden hamsters, T160
— — of the cerebella of jimpy mice and their "normal" litter mates, *388
Fiol, R. E., T. Grant, J. D. Gándara, and R. Longo, benign hypertrophy of cerebellar cortex, T153
Frank, D. H., see Sutton, C. H., T161
French, J., see Ghatak, N. R., T157
Friede, R. L., K. H. Hu, and M. Johnstone, glial footplates in the bowfin. I. ultrastructure and chemistry, *513
—, K. H. Hu, and M. Johnstone, glial footplates in the bowfin. II. effects of oubain and selective damage to footplates on electrolyte composition, glycogen content, fine structure, and electrophysiology of bowfin brain incubated *in vitro*, *513

Gangliosidosis-G_{M1}, chemical pathology of, *25
Gajdusek, D. C., see Lampert, P. W., *353
Gándara, J. D., see Fiol, R. E., T153
Garro, F., see Pentschew, A., T163
Gas-liquid chromatographic analysis of sural nerves in peripheral neuropathies, T181
Genetic variation in response to encephalitogenic myelin basic protein, T172
Ghatak, N. R., T. P. Poon, A. Hirano, and J. French, kinky hair disease. neuropathologic findings and electron microscopic study of skeletal muscle, T157
Ghetti, B., see Cassano,G. B., *308
Gibbs, C. J., Jr., see Lampert, P. W., *353
Gilles, F. H., and S. F. Murphy, perinatal leukoencephalopathy, T155
Gillilan, L. A., the arterial and venous blood supplies to the cerebellum of primates, *295
Glial footplates in the bowfin. II effects of oubain and selective damage to footplates on electrolyte composition, glycogen content, fine structure, and electrophysiology of bowfin brain incubated *in vitro*, *540
Glioblastoma multiforme produced by the progeny of a single cloned polyoma virus-induced hamster astrocytoma cell, T156
Glutamate-induced retinal degeneration in neonatal mice. electron microscopy of the acutely evolving lesion, *445
Grafstein, B., see Shelanski, M. L., T165
Grant, T., see Fiol, R. E., T153
Granule cell hypertrophy of the cerebellum lhermitte-duclos disease, pathological analysis of the first familial cases, *622
Graves, M., and G. M. McKhann, the effect of nerve growth factor (NGF) on the synthesis of gangliosides by developing neural tissue, T172
Greenberg, R., I. Rosenthal, and G. S. Falk, electron microscopy of human tumors secreting catecholamines: correlation with biochemical data, *475
Griffith, J. F., see Baringer, J. R., T159
Grunnet, M. L., incidence and histopathol-

ogy of Wernicke's polioencephalopathy, T174

Haberland, C., and M. Perou, primary bilateral anophthalmia, *321
Haddad, R. K., A. Rabe, G. L. Laqueur, M. Spatz, and M. P. Valsamis, behavioral deficit associated with transplacentally induced microcephaly in the rat, T177
Haddara, M., see Woodward, D. J., T163
